## Part number: DNP10

### Professional pneumatic tool for setting rivnuts.

This automatic rivnut tool features a SPIN-PULL-SPIN setting sequence.

Push the mandrel and the rivnut quickly spins on.

Pull the trigger half way to set the rivnut, fully pull the trigger to reverse out of the rivnut. Setting cycle is about 2 seconds.

The DNP10 has adjustable stroke for accurate placement of smaller diameter rivnuts.

DNP10 Rivnut tool is supplied in a tough plastic case with foam insert.

The tool kit comprises of rivnut tool, M3 M4 M5 M6 M8 M10 mandrels, hydraulic priming tool, containers for hydraulic oil and air oil (empty), nose changing spanners, allen key and stroke adjustment tool.

Also available with imperial mandrels.
