Part number: DRNT105

Professional hand tool for setting rivnuts

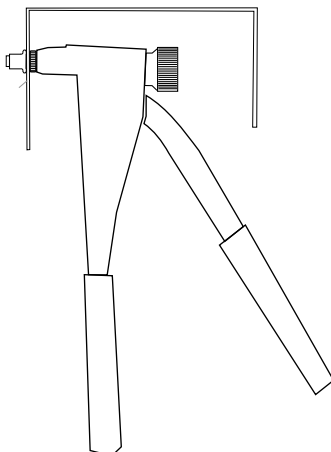

parts description

1. Anvil
2. Anvil lock nut
3. Mandrel
4. Cast aluminium tool body
5. Tool spanner (not to scale)
the spanner is used to change the mandrel. When not in use the spanner is stored in the tool handle.

application

The DRNT105 is capable of setting rivnuts up to M6 in steel and aluminium.

This tool is ideal for setting rivnuts in hard to access areas.

Use the knurled knob to remove the mandrel from the rivnut once the rivnut is set.

Ideal for small projects or prototyping.

Kit contains:

1 x DRNT105
